

CLI is Part of the iMOVE Quality Education Network

iMOVE is an initiative of the German Federal Ministry of Education and Research (BMBF) and part of the international division at the Federal Institute for Vocational Education and Training (BIBB). Its objective is to promote international collaboration between non-German organisations and German training providers and the initiation of cooperation and relationships in vocational training (TVET) and continuing education.

iMOVE started as a platform where German training providers could showcase their offers to international partners on and offline. To meet the rising demand of trainings and to safeguard potential partners, iMOVE established [quality standards](#) for providers in 2013. CLI decided to join the network at the end of last year, met the criteria for membership as a trusted training organization, and is now allowed to use the iMOVE quality label for its work.

CLI is certified to use the iMove quality label

Within the network, CLI plays an active role in promoting the importance of partnering for successful educational projects. CLI also raises the importance of sustainability in training people in vocational and continuing education. As a first contribution, CLI participated in a workshop organised by VDMA (German Mechanical Engineering Industry Association) on their [Skilled Workers for Africa](#) initiative. VDMA-member companies, as well as training providers, the German Ministry of Education, and civil society organisations exchanged on how to collaborate on improving the situation for skilled workers in countries like Botswana, Nigeria, and Kenya. It was the first multi-stakeholder exchange of this kind at VDMA and participants agreed on continuing and developing this format further to reach quality educational results in pursuit of the Sustainable Development Goal (SDG) 4 of the UN Agenda 2030.

In the coming years, CLI will continue to work with iMOVE partners on topics of vocational and continuing education. You may also have a look at CLI's [provider profile](#) within iMOVE's database.
